Hello,

I would like to suggest reading chapter 10 (pages 245 - 265) of "The New Political Geography of California", ed. by Frederick Douzet, Thad Kousser, and Kenneth P. Miller. I believe it will be informative for the commissioners to read because this chapter, among other things, details the perils of redistricting in the context of Californians self-sorting themselves into homogeneous areas of political preferences. The ISBN# for this book is: **978-0-87772-426-1**.

Thank you for taking my views into consideration.

All the best,

Scott Allen
