Subject: CBO's

Message Body:

CBO's do not represent all of the voters...They are heavily financed and subsidized backed by well oiled special interest organizations. There are average citizen's who have organized because of how we voted in Nov to establish this commission to hear the average citizen. If you do not allow smaller average voters groups to be heard, there was no reason for this commission to exist....The CBO's already had heavy influence on redistricting because of their connection to the elected officials. Please do not let this commission go off track.
