Commissioners,

You have been entrusted with the remarkable task of assigning fair and equitable resource management and political representation within the most diverse state in our United States. Dynamic enclaves of social integration combined with self imposed " sub-cultural" segregation either by choice or market forces unite us geographically. Evident is the fact that this process, once finalized, will, for the first time in history, be deconstructed through social networking. This medium recognizes, respects and rewards objectivity, fairness and honesty. We are currently witnessing events in North Africa and the Middle East where this social phenomenon exposes unjust decisions, unfair treatment of its people and consequences that follow. You are all aware that most if not all polls reflect that citizens of the United States do not trust or respect their government. Wael Ghonin recognized this to be true of his government, albeit believing that, the power of the people are stronger than the people in power and proceeded to challenge this . His courage and honesty is transforming Egypt and other parts of the world if not most of it including California and the United States. As you proceed in this sensitive process, may I respectfully indulge you with this timeless message;

If you can look into the seeds of time,  
And say which grain will grow and which will not,  
Speak then to me, who neither beg nor fear  
Your favour nor your hate.

Good Luck and stay tuned
