If the goal of redistricting is to create communities of interest, then this district certainly meets that standard. We are predominately a progressive thinking community, concerned about the environment, the santa Monica mountains, the ocean, the quality of the air& the joy of hiking and walking. it would be a great disservice to break up this greater, very homogeneous community/ district.

If the goal is to create districts w/communities of interest, then it would be a great disservice to break up this district. We are mostly a progressive thinking group of citizens who care deeply about the santa Monica mountains, the ocean, the quality of the air, and sustaining our environment generally & specifically.

this district is very homogeneous. Thank you for your work for our state and for your consideration of my comments.
