I was a final contender for this panel. I have spent much time considering how to “draw the lines”, based on demographics, regionality and the reality of areas. Please continue to keep an open mind and apply only that which truly applies to our districts. Do not allow yourselves to be affected by the political pressures that are being brought to bear upon you. I live in Monterey County. We are primarily an agricultural community, with a small percentage of tourism based communities. We do not align ourselves with the demographics of Santa Cruz, nor should the Cal Poly community be included in the North San Luis Obispo district, based on those demographics (another gerrymandering issue). Please be true and pure in you decisions, as difficult as that may be. I wish you good luck and good wisdom in your task, as I understand how difficult and time sensitive it is. Listen to the people!
