Subject: Region 9 Assembly District Changes

Message Body:
Hello,

I will be submitting to the Commission an amended Equivalency file which is a change to the file I submitted on Friday, June 24 in Stockton.

I did not get a chance to describe the solution I propose at the Stockton hearing because the time clock was not visible to the podium. I have also changed the district in which Davis is located. So the seven district population swap is as follows:

Davis goes with Yolo in the ECC district,

Yuba County and parts of Sutter go to WSAC -- a 15.5% LCVAP instead of a 10.5% LCVAP (How can you leave Yuba in with Redding when Latinos would be able to get representation through coalitions in two options which I have provided??),

The district that was called YUBA but now no longer has Yuba County gets Modoc, Lassen, and parts of western Butte and eastern Siskiyou counties from MTCAP,

MTCAP gets eastern Placer and parts of El Dorado County from FTHLL

FTHLL gets Lodi, Galt, and other San Joaquin towns from ECC and STANSJ,

Stockton gets the waterways important to the port,

There is also some cleanup that happens between FTHLL, STANSJ, and MRCED

Please excuse any error on my part by going over the time limit on Friday. I am a volunteer line drawer. I am covering my own time and expense. This is true of all 3 line drawers who have come together and received the endorsement of the Sierra Club for the work that we have done.

Please consider my map submissions as replacing the earlier pre-first-draft version I submitted. The map is only to show changes to districts in the Sierra Nevada Mountains and the Central Valley. The map does not constitute a recommendation for LA or the Bay Area.

Finally, I want to say that the lines that I have drawn in this latest revision have less population deviation than the Commissions first draft lines. I understand that the Commission is seeking less than 2% deviation. The totals are from the Mapitude software that I have been using.

Thank you for your consideration.

Regards,

Don Nicodemus
