Dear Commission Members:

Please consider the establishment of a Southern California District similar to the existing Region 3, uniting San Diego, Orange, and Riverside counties, in lieu of the present map of a vertical district ranging from the *Oregon border to the Mexican border*.

Please consider the establishment of a Southern California District similar to the existing Region 3, uniting San Diego, Orange, and Riverside counties, in lieu of the present map of a vertical district ranging from the Oregon border to the Mexican border. I cannot believe that this concept would even be considered. Where has common sense gone?
