To: "[REDACTED]" <[REDACTED]>

It's time for a change, the first time I saw this happening was when I was in six grade and things have not change,
But the Hispanic groups have to come together and stop this.

Subject: where is the racial and ethnic breakdowns

Message Body:

why are the maps not able to show the populations by race and ethnicity.
are you ashamed that you have not given latino voters their rights?

--

This mail is sent via contact form on Citizens Redistricting Commission

This seems like gerrymandering to prevent latino voting blocks.

I have no idea why you asked for community input when its clear that efforts to dilute Latino voting seem to predominate the thinking and outright reach of these maps. As a citizen I would like to know how these boundaries affirm the very criteria used by the commission. And which factors were those having the most weight. From what I see wealth was intergral to this "democratic process".

Subject: Vote no

Dear Republican Commissioners,

I urge you to vote no on the CA redistricting maps. The maps do not follow the community of interest rules that were set out for the redistricting commission. At this point in the corrupt process we would be better off having judges re-draw the congressional districts.

Thank you,

Pam Farly

general

REDISTRICTING COMMISSION FAX NO. 

Dear Commissioners:

The citizens of California voted to have a citizens' commission draw new district lines with the expectation that these citizen members would draw districts free of political bias that has existed in the past.

Instead, we apparently have maps that show strong bias in favor of Democrats. In fact, it has been reported that members hid their membership and work for special interest groups that they then advocated for in the redistricting process.

I urge the members on the Commission who are concerned about the result to vote "NO" to the adoption of these maps.
