Hello CRC:

The CRC is looking for a vendor to provide redistricting services. Once you have a vendor, will the CRC provide the guidelines that the contractor will use to draw the district lines? What can the software that is available do in the process, is there much manual steps involved or do they push a button and out pops the district lines. Has the CRC look to Iowa to see how they work the redistricting process. I understand Iowa gets very high marks for non-partisan district lines.

Thank you

Gary Lindgren
