Subject: Mapping suggestion for Karin MacDonald
To: votersfirstact@crc.ca.gov

Please forward this to Ms. Karin MacDonald.

Greetings:

Here's an old method that might work fairly if applied as new....

Take the concept within the 1798 Northwest Ordinance where the territories were mapped out using the rectangular township grid system. Each township I believe was sixteen square miles? in size.

Perhaps such a hybrid, rectangular scheme, could be applied here, in California, thus eliminating gerrymandering.

Regards,

Tom Dorich
