

JURISDICTIONAL SPLIT REPORT – LOS ANGELES COUNTY

This document presents the Los Angeles county subsection of the statewide report that shows the populations of California’s cities and counties in context of the “ideal populations” of the districts. This document provides an overview of jurisdictions that are larger than districts, which means that they will have to be split by district lines, as well as jurisdictions that are smaller than one of more of the districts, which means that *in theory*, it *may* be possible to contain them in their entirety within a district.
