commissioners

Boundaries in Modesto and Stanislaus county make no sense. one silly example is the line separating the 18th from the 19th congressional districts. The line goes down the middle of Rose Ave. in Modesto. Talking issues with the neighbor across the street-but they are in a different district.

Since politicians always vote along party lines and care very little about issues and their constituents your work is very important. I hope boundaries that represent areas of common sense will help neighborhoods be represented more fairly

Please devise boundaries with some common purpose. I would suggest a mission statement that starts with County lines, natural borders like rivers, not splitting up towns or cities unless above a certain population size, and then use a large divided high way rather than a residential street such as is the case in Modesto on Rose Ave.

thanks to all members for taking on this challenges
