California Redistricting Commission

Commissioners,

I believe that the E. Ventura County districts should not be radically changed. The demographics of our area substantiate this position, per the guidelines you are entrusted to follow.

Simi Valley, Moorpark, The Conejo Valley, and the Santa Rosa Valley, are linked and share common geography, roads and freeways. Our businesses are interrelated by types, common business interests and Chambers of Commerce.

We have common open space habitat areas and water issues/ suppliers. The commonality of the residents although diverse politically and ethnically is a fact. We even share a landfill.

This area should not be grouped with West Ventura County or Los Angeles if we are to be fairly represented by our elected representatives.

Doug Crosse
