In deciding where to draw the line in Madera County please be aware that one of the major problems in Madera, Chowchilla, Mariposa, Oakhurst, and Coarsegold, etc. - as well as surrounding areas - is very low education levels and in-bred populations. Segregating some of these poorly educated areas into separate groups can be like a war between the Hatfields and McCoys. I feel these areas need to be connected to more diverse other areas to keep these differences from becoming lineage wars. Also the indian tribes have a lot of valley influence, probably more so in the mountains where they are located and control most of the money and commerce.
