Subject: Redistricting of Northern California

Message Body:

I urge you to leave intact the Northern California districts as close to their present boundaries as possible. I feel our elected representatives have enough difficulty traversing their districts with the northerly/southerly highway system we have. If the north portion of the state from coast to Nevada were to be drawn into one district, our elected representatives would have a nearly impossible task traveling their district as the highway system does not go east/west. What roads do exist are not passable during winter weather conditions.

I also feel that the agricultural central counties have nothing in common with the desert counties to the east nor with the wet coastal counties to the west.

Thank you.
