

From: Ron Robinson [REDACTED]  
Subject: Five Percent Deviation Will Not Fly

Message Body:

Both federal and state courts have decided clearly that only a 2% maximum population deviation among districts is allowable.

If you persist in your plans to allow a 5% deviation among districts, then you can expect restraining orders and lawsuits at a minimum; and vigorous, constant citizen opposition as a constant factor.

You were commissioned to serve the people of California, not betray them.

Please reconsider your action to allow for a 5% population deviation among districts, otherwise, I think you will find yourselves embroiled in a rather messy controversy. Do not cast away the authority of your commission by engaging in this sort of sordid politics.
