To me, the natural place to split San Joaquin County is north and south, - with the dividing factor being the City of Stockton. I lived and worked in - Lodi for a year and a half, yet I never ventured south into Stockton. - Instead, I went north to purchase big items or go for entertainment or recreation. I still have a rental property in Lodi and I'm glad it's there - rather than further south because the neighborhoods are quite different. - I don't believe my property value would have held up as well because of - the increased crime and neighborhood deterioration in and around the City of Stockton. So, please put Stockton with Tracy and other cities in - the south and not with us in Lodi. Thanks. -
