Conversation: Redistricting

I am a resident of Coachella Valley in Riverside County and am seriously concerned about the redistricting of our valley. We are very fortunate to not only enjoy living in one of the most beautiful areas in this country but we also live in a community that has much to offer – great health care systems, efficient airports, good roads, good schools, and a population that cares and works very hard for a quality of life. We are basically a self-sufficient community that thrives on the benefits of resort living, welcoming many snowbirds who help support the financial costs of this lifestyle. We are a Community of Interest and want to remain such. I believe that a change that would include melding another county, Imperial County, with Riverside County would be a serious mistake, as the two counties are so different and would drive out Coachella Valley’s most important source of revenue – our seasonal guests and the many seasonal events that brings in even more revenue. We are not an agricultural community and not should we be asked to support other counties.

As a voter and tax payer, I ask that you keep Coachella Valley intact as the other communities of Riverside County have similar levels of development and Community of Interests. Thank you for your very serious consideration of my request.
