Subject: Kingsburg

Message Body:

All this talk about having districts that have common goals is good, however Kingsburg has Never Never Never been in a district with even close to common goals as Kingsburg needs. Kingsburg is not serviced at all by are districts elected officials. We are a Tri-county school district that has much more in common with Kings and or Tulare counties. Please dont continue to throw us under the bus.

Subject: Online Maps

Message Body:

I live in the City of Fresno. The online maps do not "zoom in" enough to see district boundary lines within the city.

Thanks for your efforts.

Dear Sirs:

I had hopes for a local US Congressional district, but I see that in your draft map you have once again chopped Fresno into pieces. How could the city of Fresno NOT be a community of interest? How could the people of northern Fresno have more in common with the residents of Lindsay or Tulare or Woodlake and farms in between than with those in southern Fresno? How could the people in southern and western Fresno have more in common with people living in hamlets and on farms on the far side of MERCED [!!!] County than with other residents of Fresno? It's totally preposterous. I was under the impression that you were not supposed to go whacking cities into pieces unless they had too many residents to constitute a single district. I currently live in a gerrymandered section of metropolitan Fresno that is designed to keep someone in the mountains in office; I guarantee you that I have much more in common with Fresno residents in general. I have close to nothing in common with rural Tulare county residents beyond our species.

Sincerely,

Alan D Barbour
Fresno, CA
