Subject: Congressional District 7-George Miller

Message Body:

I have lived in Richmond since 1976 and George Miller has been the representative for Richmond since being elected and has represented us well. By drawing the new lines and placing Richmond in Barbara Lee's district will mean that Richmond will be placed in a district with Oakland and Berkeley which are 3 high need areas. It will also place people of color into one district. This is segregation! As a former Trustee of the West Contra Costa School District this will mean that the district will be represented by 3 Congressional Districts diluting support for a much needed district.

Subject: First draft of assembly districts

Message Body:

The separation of Oakley from its regional partners of East Contra Costa County is horrible. It appears we are purposely isolated from our historical neighbors; we war with only some of the neighboring communities with which we share a fire district (East Contra Costa Fire Protection District) as well as a transportation agency for roads of regional significance. We are removed from the municipal governments of our region and grouped with County - unincorporated communities - that do not share our needs or focus. This is unacceptable and deserves grave reconsideration.

Subject: Pathetic

Message Body:

THIS is the best you could come up with ? I live in Danville, about as upper middle-class, white, suburban a neighborhood as you can get. Yet even AFTER your redistricting, you continue to group us with Lodi, Manteca, etc. -- people who's demographics and INTERESTS are as opposite to mine as can be. How do you expect ONE congressman(woman) to fairly represent me and my interests when you're grouping me in with a vast majority people who are polar opposites to me? Once again, people like me get the shaft. No wonder CA is going down the toilet. People like you are morons and don't deserve any better than what we have.

Subject: Draft maps

Message Body:

To whom it may concern;

I appreciated the redistricting process will be fair by respecting geographical boundaries, people, cities, and counties. I live in the Bay Area and I could not see the boundaries for Bay Area and LA. Could you provide maps with more granularity as the same as the 2001 maps.

With kind regards,

Clint
