Subject: Misguided

Message Body:

California is essentially a state which runs north to south. Coastal communities, inland communities and mountains communities inherently have more in common with one another than they do with each other. Given that reality. It is a disservice to both communities to lump together such disparate areas as Sonoma and Yuba. I'm pretty sure the farming communities of Central California don't want the coastal progressives making decisions for them, and vice versa. It's not about preserving districts for particular political parties; it's about preserving the representation citizen's want.

Subject: Mapping

Message Body:

Just curious why you would Southern Sonoma County (over 100,000 people) with Marin County yet only refer to it on the web site as Marin. You have other counties broken out as northern and southern but you overlooked us.
