What could be the basis for including part of Sonoma County in a district that is largely populated by big agriculture and arch-conservative interests? Is anyone on the committee familiar with this part of the state? If not, please visit our community soon! Blessed with small family farms, rugged coastline, and a population committed to environmental protection, we could not have less in common with Yuba, Colusa, and Glenn County voters.
Why split Sonoma County?
Thank you for considering taking another look at Northern California redistricting.
