Message Body:

Please look at combining Counties to the East of Del Norte and along the Oregon State line as they are also rural and less industrialized, this will provide us with legislation imperative to rural area survivability. Rural and agricultural folks - East/West district have a lot more needs of substantially different nature than those of our southerly neighbors. We would essentially be subjugated to the desires of the more densely industrialized areas with the maps currently provided. The Industrial areas you suggested have little in common with rural and agricultural areas. Your maps as suggested would only service the industrialized areas south of us due to being of higher density populations that have little in common with the rural areas. Rural and Agricultural areas have requirements substantially different than those of industrialized & high density areas. Your suggested maps would overwhelm and virtually eliminate any of our concerns. Please change your maps to the counties east of us and remove us from the industrialized areas. Thank you.
