

**GENERAL
RECEIVED**

Subject: Proposed 2010 Redistricting Structures

JUN 28 2011

June 27, 2011

To: The Citizens Redistricting Commission

Per _____

The 2000 redistricting accomplished by the legislature resulted in 71% of possible intact counties and districts and 21% of split communities in those counties that were not intact. Enclosed for consideration is a set of proposed redistricting structures based on the 2010 census that result in 90% of possible intact counties and districts and less than 4% of split communities.

There are three sets of documents pertaining to the proposed 2010 redistricting structures for the assembly, state senate, Board of Equalization and the congressional delegation as follows:

1. Each district is block diagrammed in the first set of documents with component communities color coded green for intact counties, yellow for intact districts, red for split districts, tan for split communities, and gray for component communities within the City of Los Angeles. A darker shade of gray identifies split communities within the City of Los Angeles. There are five communities in Riverside County and one in Los Angeles County I could not locate on maps available to me that are color coded purple. Population data for these redistricting structures is from the California Department of Finance Demographic Research Unit. The population for each component community within the City of Los Angeles is from the Los Angeles City Almanac. The title bars of the assembly and congressional district blocks are color coded red, green, yellow or blue in accord with similar colored community markers on regional maps of the state that better portray each proposed district.
2. The second set of documents lists the communities in geographic sequence within each split county with the population of each community and district number of each proposed district.
3. The last set of documents identifies the counties in geographic sequence with the population and proposed districts of each county. Counties are numbered in sequence from north to south and from west to east where counties are essentially parallel to facilitate the more proper numbering of districts. Communities within each split county are numbered in the same manner.

I am available to respond to any questions that you may have and wish you the best of success with your challenging endeavor.

Enclosures as stated:

James R. Vanderveen

Color Code
District intact within a county
County intact within a district
* The number following each intact county is the sequence of that county from north to south and west to east.

Subject: People's Advocate Testimony

Message Body:

As you know, People's Advocate was an early supporter of this Citizen's Commission and turned in a set of maps for the southern California region at your first hearing. After monitoring all of the hearings in southern California we determined that many of the issues addressed could be fixed by an easy solution.

Since the Assembly seats were drawn correctly in southern California, a simple re-nesting of various assembly seats into new senate seats will take care of many of the coastal issues, watershed issues, communities of interest issues, farm worker issues and a whole host of other issues brought forth at the public hearings. There is no population deviation in my Senate handouts, since I used your own assembly maps.

For example, the Assembly seats are done correctly in Ventura County, but the Senate seat should be changed. By changing the nesting of assembly districts, you can keep communities of interest together. Instead of nesting Santa Clarita with Malibu, you should nest Santa Clarita's Assembly seat with East Ventura County. That is a simple nesting of your Assembly Seats labeled EVENT and LASCV. Historically, for over 30 years, these areas have been connected in a Senate seat.

Likewise, nesting Assembly Seats SLOSB and SBWVE will take care of the city of Lompoc issues and other Santa Barbara County concerns voiced at the Oxnard hearings. This keeps Santa Barbara County whole in a senate seat. In addition, this gives historically underrepresented groups, such as farm workers in central coast areas of Santa Maria, Piru, Fillmore, Oxnard and El Rio, a united voice.

In addition, re-nesting of Assembly Seats LAVSF and LAMWS will take care of the coastal concerns voiced by several of the environmental groups. It will also solve the problem of Malibu being connected to Kern County, which many speakers, including the mayor of Malibu, objected to. Likewise, this will take care of the residents of Studio City who voiced their concerns of being connected to Ventura County.

Again, thank you for your services and I hope that this easy fixes will be given your consideration.

Citizens' Redistricting Commission
[REDACTED]
Sacramento, CA

Dear Sir or Madam,

I have been following the maps drawn by your committee. The latest one had less fingers and more fists. I applaud you for that. The districts should be contiguous and hold zip codes, counties or water or school districts.

I want to make sure that the districts are NOT drawn by political party lines. This has nothing to do with an honest redistricting process.

Keeping you honest.....

Yours sincerely,

Bea E. Gunn Phillips

~~CONFIDENTIAL~~ GENERAL

RECEIVED

June 24, 2011

JUN 28 2011

California Citizens Redistricting Committee

Per _____

Sacramento, CA 95814

Madam Chairperson,

Thank you for the opportunity to express our concern regarding the proposed reformation of Congressional and state Senate and Assembly districts.

The conflicts and restrictions imposed by the state constitution, state regulations and the rulings of the U.S. Supreme Court will make it almost impossible to please or satisfy most of the citizens of this state. Additionally, meeting the population restrictions and requirements of the three districts: Congress, 680,000; state Senate, 900,000; state Assembly, 450,000 will create more problems. This will be all but impossible in large areas with small populations. The requirement that the area be a single geographic area (no islands), represent common areas of interest, without taking power away from major ethnic groups, make it even more difficult.

We would recommend that you create broad and consistent goals and policies for all districts in the state.

You can, as required, make exceptions by cutting and filling or as required.

Our goals would be as follows:

I. Reorganize the six major geographic areas:

1. The Los Angeles-San Diego coastal area.
2. The area east of Los Angeles-San Diego to the Arizona.
3. The southern coast area from Los Angeles to San Francisco.
4. The northern coastal area from San Francisco to Oregon.
5. The central valley from Kern county north to Sacramento.
6. The central valley from Sacramento to Oregon. (No central valley county should be forced to join a coastal area - no merging of Merced with Santa Cruz or San Jose).

- II. A state senate district would consist of just two (2) state Assembly districts.
- III. As much as possible, Congressional districts should cover no more than one and one-half Assembly districts.
- IV. There should be no long, wide, or odd-shaped districts (e.g. The way 80 Hwy to Fresno).
- V. Districts should be formed so that 85% of the voters could drive to a district office in less than one and one-half hours.
- VI. Accept the fact that some areas (the eastern Nevada-side of the state) will, with their very low population, fail to meet many of the above objectives.
- VII. We must Accept growth and location for what they are. The central valley district should predominately go from west to east and then go north or south until the population requirement are met.

The south-eastern counties would go from the east to the west (LA) and the coastal counties, should go to the crest of the coastal range should go to the north or south.

Adjustments in district sizes would occur in LA and the SF-Sacramento areas since the populations and their interests are similar. Here minor changes in distance will have little effect in the makeup of the population and their interests.

The above polities reflect the actual business, water, and transportation situations in California. These policies make sense - are easy to understand - and will be easy to sell to the people.

While some minor changes and adjustments may be required, these policies will meet the needs of the majority. They will be accepted by the majority of the people and we believe they will withstand any court actions.

Sincerely

Charles Day

Subject: From Latino Community Members

Message Body:

Dear Redistricting Commission:

First, we would like to thank you for your work and dedication in heading the unprecedented citizen redistricting commission in our state. We are sure your work has come with great sacrifices to your regular jobs and family lives, especially as deadlines near. We are writing to provide public comment on the first draft maps. We greatly thank you for extending the deadline as without the extension, we would not have been able to comment on time.

We write as Latino and Latina members of community and academic organizations. Our first comment is to convey our disappointment in seeing no change in the number of Latino/a effective districts in California. From 2000 to 2010, our state had a growth of 3,382,308. Of those new California residents, 3,047,163 were Latina/os. That is, 90.1% of the growth came from the Latino/a community.

The reason why we have redistricting every ten years, whether it's done by the Legislature or an independent commission, is to evaluate the changes in our state and adjust our district maps respectively. We don't understand how our community can be responsible for 90% of the state's growth and not see an increase in the number of its effective districts. Further, this is the most populous state in the nation. This 90% growth accounts for over 3 million people. If half of that growth was of citizen voting age (CVA), and it was more or less concentrated in a few regions, we would potentially be seeing 2 more Assembly districts and about 1 more Senate district. However, the draft maps do not propose an increase in our representation and this is a major cause for concern.

We are also concerned that the net effect of the proposed maps may potentially result in negative representation for the Latino/a community. In analyzing the Redistricting Partners document of the demographics of proposed districts, we notice that some Latino/as who have been elected are now in the same district; that some incumbent Latino/as are proposed to be located in districts where it would be difficult to re-elect them; and that yet other proposed districts are vacant, perhaps leaving open some opportunities for new representation. Thus, our concern is not limited to the absence of no new Latino/a effective districts, but is also inclusive of the concern that we may possibly lose a few representatives who have previously been supported by their constituents.

California's population is incredibly diverse. However, we understand that it is the Citizen Voting Age Population (CVAP) that elects its representatives. This is one factor that explains why our representatives in governance structures are not exactly representative of the state's actual population. In the Latino community, many of our members are underage while others who are of age can't vote due to the fact that they are not U.S. citizens. Further, of those who can vote, not all will exercise their vote due to other factors including lower civic engagement levels and disenfranchisement.

As engaged community members, we are very aware of these dynamics, hence our involvement in our communities to improve them, improve our democracy and ensure fair governance at the institutional level. With the unprecedented citizen-led redistricting effort before us, we are most interested in our fair representation, especially when we

feel that the census data supports our concerns and request.

To close, we would like to address the criteria that are used by the Commission when drawing our maps and make a request in respect to them. We would like to request that you place a stronger weight on the Voting Rights Act, which is criteria number two, than on the desire to draw more compact maps per criteria number four. While we understand that asymmetrically shaped districts may be awkward-looking, and even "suspicious-looking" at first glance, it is very important to uphold the Voting Rights Act. This is immensely more important to our community than our desire for more symmetrically shaped, compact maps. Further, "communities of interest" should be kept together regardless of whether they may fall in adjacent cities or adjacent counties, so long as the district can be drawn contiguously. Overlapping county or city boundaries with district maps should not be of high priority. What should matter is equity in keeping our communities together regardless of a county!

or city line. As an example, I'll point to the communities of Parlier and Orange Cove in Fresno County, that are geographically close and demographically similar to Dinuba, Orosi and Cutler in adjacent Tulare County. This cluster of communities is broken up by two different proposed Assembly maps.

We greatly thank you for your time in considering this public comment.

Sincerely,

Vianey Nuñez, President, Goldman School Latino Speaker Series, UC Berkeley, Berkeley, CA

Neptaly Taty Aguilera, Former State President, CAFÉ de California, a Statewide Chicano State Employees Association, Sacramento, CA

Tony Perez, Past DLC President, SEIU 1000 and Board Member, Florin Resource Conservation District, Sacramento, CA

Rey Leon, Executive Director, Valley Latino Environmental Advancement Project, Fresno, CA

Rafael Aguilera, Principal, Verde Group Consulting LLC, Sacramento, CA

Pablo Rodriguez, Communities for a New California (CNC) Educational Fund

Alondra Flores, Director of Expansion, Professional Latina Sorority Alpha Pi Sigma, Fresno State Univ., Fresno, CA

Raul Macias, Board Member, La Raza Law Students Association, University of San Diego School of Law, San Diego, CA

Angelica Tellechea, Alumna, Sacramento State University, Sacramento, CA

Carlos Alcalá, Parish Member and Harvard Alum, West Sacramento, CA

Norma Alcalá, Parish Member, West Sacramento, CA

From: James Tank <[REDACTED]>
Subject: Davis and the Delta

Message Body:

Good afternoon -

Though I am a resident of the City of Sacramento, I spend a great deal of time and energy in the Delta, advocating for the people and land of this unique region. The interests of those of us living in Sacramento and West Sacramento, while geographically connected to the Delta via 160, could not be more divergent than with those of the small-holders and agricultural labor communities of the Delta. It is for this reason that I support combining Davis and West Sacramento with Sacramento in current districting effort.

Recent land deals in Yolo County to appropriate water to Davis and recent sales of Yolo land whereby water will be transferred south of the Delta show that while the Delta extends geographically to West Capitol Avenue, the needs of the Delta begin to diverge from the folks of West Sacramento and Davis well south of Hwy 220. While Davis has the right to secure a reasonable water supply, it has chosen to do so without regard for the political or environmental impacts on the people and land of the Delta.

Southport development and recent improvements in the Raley Field and Capitol Avenue corridors leave little question that West Sacramento is developing an exciting new urban environment with the same riverfront ambitions as its neighbor on the East bank. Though, West Sacramento may have an agricultural past, the consolidation of Broderick, Bryte and West Sacramento decades ago clearly indicate the desire for its people to make it an urban hub.

For the last decade Sacramento has not kept up with environmental standards in treating waste water before discharging into the Sacramento. As urban folks, the communities along the 80 corridor have done little and have even resisted efforts to take responsibility for the damage done to the Delta water supply and habitat, citing costs. It seems clear that Davis, Sacramento and West Sacramento's interests around water and natural resources have a great deal more in common than with Walnut Grove, Isleton or Courtland.

The citizens of the Delta have previously been represented by folks elected by the same people who are polluting their water. While I am politically very liberal, it disturbs me that the people of the Delta have little recourse in appealing to representation that serves a primarily urban population. It is for these reasons I support the inclusion of Davis and West Sacramento into an urban district with Sacramento. It is time that the agricultural communities of the Delta have an elected voice of their own.

Sincerely,

James B Tank

MEMO

To: Citizens Redistricting Commission
From: David Salaverry, CCAG
RE: CCAG Maps, The Process So Far
Date: June 28, 2011

Introduction

I am David Salaverry, the leader of the California Conservative Action Group (CCAG) and the creator of fairthelines.org. As commissioners and staffers know, I've been following the CRC since the Sacramento hearings in February. CCAG and fairthelines.org is a pure grassroots phenomena. CCAG has no funding from any foundation, institution, political party or private individual. I don't have academic pedigrees or legal training. Our organization bank account has less than \$100 in it, we just last week put a donate button on our website.... but we do have a passion for fairness and honesty in politics.

CCAG and Q2

The maps we have developed for the commission were created entirely at the Berkeley Redistricting Assistance Center on the computers furnished by the commission cooperatively with The Statewide Database. We would like to state for the record that Karin MacDonald and her team Nicole, Tamina, Andrew and others have been very helpful and shown us every courtesy.

However, the personal relationship our team has developed with Q2 should not be taken to indicate support for the maps Q2 will produce, nor our approval of the internal processes behind those maps. We are firewalled at the Redistricting Assistance Center from Q2s commission work, *as we should be*. We have no knowledge of Q2 processes nor any special knowledge of what they will produce.

CCAG Mapping Goals, The VRA

We've created our districts with one central theme... fairness. Our goal has been to follow the Prop 11 and Prop 20 criteria rigorously. As conservatives, we are a minority in the Bay Area, outnumbered in some areas 5 to 1. We have no desire to game the system to gain more than basic fairness through a rational process.

With respect to the Federal Voting Rights Act, Northern California, unlike Southern California is not significantly stratified into ethnically or racially cohesive areas large enough to create full districts.

Therefore, although we have drawn maps with minority enclaves in mind, we feel that structural communities of interest as defined by Props 11 and 20 should take precedence over ethnic or racial communities of interest which we believe may be used by our political opponents as a substitute for the VRA to create districts.

CCAG East Bay Maps

As Slate Magazine, The Washington Post and others have noted, the existing CD 11 was grossly manipulated in the past to crack and pack suburban conservative voters from TriValley to Concord to Lamorinda into districts that diluted their votes. Our maps end this egregious gerrymander which has kept our community of interest from electing candidates of its choice.

The TriValley-Lamorinda-Concord community of interest is structural, economic and based on political entities within Contra Costa and Alameda Counties. It consists of suburban bedroom communities and corporate office parks tied together by Highways 580 from Dublin to Tracy, Highway 680 from Pleasanton to Concord and Highway 24 from Walnut Creek to the Caldecott Tunnel.

Our new districts fulfill all Prop 11 and 20 criteria. There was overwhelming support for our East Bay district at your hearing, not only from those who live and work there but also from those in communities from Oakland to Hayward who do *not* want to be districted with the TriValley-Lamorinda-Concord. We kept traditionally African American areas from Richmond and Berkeley to Oakland whole in our maps, while remaining sensitive to the emerging Hispanic populations in South Oakland and San Jose.

On June 7, close to forty community members from the Fremont, Hayward and Newark area spoke to their Asian Pacific Islander COI which they did NOT want linked to TriValley-Lamorinda-Concord as the commission had done in its first iterations.

The Process So Far

I would like to speak frankly about the commission process so far. Although the commission has had successes and now released first draft maps, an objective critique is in order.

Many of the problems the commission faces began with poor early decisions. Others flow from imperfect legislation. The worst early decisions were those partisan votes made within the framework of initial mutual distrust. Given the compressed timeline of the commission's work, it was perhaps inevitable that early partisanship would create conflict. There was little time to get to know 13 strangers before the battles began.

I believe that hardball partisan politics over the hiring of the Voting Rights counsel and the line drawer is the "original sin" of the commission. The animosity has been cyclical and not universal to all commissioners but has broken out several times in hearings and possibly more often behind the scenes.

This isn't surprising. We are currently a nation and a state more divided than usual. Also, partisan conflict is coded into the DNA of our democracy. It's how you mitigate conflict that matters. The principle failure of this commission is that it hasn't addressed the partisan conflict through compromise, it has merely (temporarily) swept it under the rug in false unanimity.

Gibson v Nielsen & Rose v Q2

Gibson, Dunn & Crutcher, the commission's choice of a VRA attorney was in retrospect a mistake. The Gibson lawyers had little VRA experience and were brought to the process because one commissioner picked up the phone to ask a friend and colleague to bid. Gibson's lack of experience is telling; in hearings on the eve of release of the first draft maps, the commission seemed frustrated with Gibson's inability to give clear answers to thorny VRA technical questions. And the initial Gibson Dunn advice that no LA VRA districts were needed has created a firestorm of protest and many likely changes.

Gibson, though less experienced, was the more expensive choice; initially coming in on a \$150K contract they quickly raised the ante to \$249K. Given the Gibson lawyers \$800-\$900 "normal" hourly billing, it was not surprising that their original bid almost doubled. Nielsen, Merksamer's Marguerite Leoni bid of \$150K, included mapping expertise and attorney Christopher Skinnel, a recognized VRA expert.

The choice of a mapping consultant was also questionable. Q2 was originally brought in on a no-bid basis. This became a problem, The Rose Institute also bid. Q2 is an academic outfit with a thin resume of redistricting for the City of San Diego and County of San Francisco only. Although Q2s application claims it is a woman-owned business, Bruce Cain is on the LLC paperwork as co-owner. The commission did not to my knowledge ask about Cain's ownership percentage or inquire as to the financial relationship between Cain and MacDonald.

The Rose Institute on the other hand redistricted Arizona, performing exactly the functions the commission would require on a statewide project. Nevertheless, Rose was rejected, ostensibly because they could not release a list of their financial backers in a 48 hour window. The real reason was partisan and political.

Had the commission understood the need for coalition building at the beginning, had left-leaning commissioners not played tribal political hardball and assassinated the professional character of both The Rose Institute and Nielsen Merksamer, a reservoir of good will might have been created by hiring a left-leaning VRA and a right-leaning mapper or vice versa. That reservoir would have been there for the commission to draw on in the badlands that were sure to be ahead.

All the firms in the bidding process at the final cut were honest, reputable and would be scrutinized to such an extent as to make collusion unlikely. The commission should have known that.

Outreach & Transparency

Although outreach and transparency have been goals from the beginning, the commission has fallen very far short of the mark. Outreach has been *through* special interest groups, (what I have dubbed the “alphabet groups” of the institutional left) and directed *to* their narrow ethnic and racial base. There has been no outreach whatsoever to conservatives, though outreach to ethnic, progressive media has been trumpeted.

The commission’s PR work has been poor and its media presence limited as a result. Although many in the media think redistricting is a boring, technical subject of little interest to the average “consumer” of news, that attitude only presents a challenge to be overcome. The commission has not overcome it, and as a result input hearings in the first round were lightly attended relative to the importance of the commission’s work.

The process is far from transparent. Videographers have consistently been behind in posting the videos and the cheaper, lower quality vendor was hired; the results are there to see. The commission has relied on meaningless, boilerplate agendas that violate the spirit if not the law of Bagley-Keene. Letters are disorganized on the website and difficult to view.

But the biggest error was the decision to spend one quarter of the \$2 million budget on VRA lawyers and zero on transcripts of input hearings. This was an important early mistake that has led to disorganized, ad hoc mapping sessions and many strange districts.

The COI Database

At the end of the first draft process, the commission has belatedly realized it does not have a robust, functional COI database. In the public hearing the day before the first drafts, we learned that Q2 was supposed to create a database and did release a data model but that the COI testimony is not yet in a form the commission can access. This is a startling failure!

Community of Interest testimony is the foundational “stuff” of Props 11 and 20. California voted to take redistricting away from politicians and put it into the hands of citizens *through* the medium of open hearings and COI testimony. That the commission has treated this precious citizen input with such cavalier disregard is astounding.

The commission elected not to pay for transcripts of public input hearings that could have been a repository of citizen testimony. And Q2 apparently has not created the database contracted for, so the commission was forced to discuss giving Q2 more money to finish a database already a part of the Q2 contract on the day before first draft release.

As a result of these failures, the public’s will is effectively marginalized. While snafus at Q2 are perhaps understandable given their relative inexperience, it’s astonishing that the commissioners themselves

have paid so little attention to COI. I have watched the line drawing process and seen the commissioners time and time again confused about *who said what when and where*. As a result the mapping process has been capricious and incoherent.

Here's how the COI process seems to go: A commissioner grabs some bit of COI dander floating in his or her loose notes or head and throws it out to the mapping floor. Then, those commissioners with an interest in the particular geographic area (and the interest is highly selective) bat the dander around for a while till it finally settles and something is communicated to Q2 that later hopefully gets mapped. This dander chase and reliance on faulty memories and loose notes has led to notable absurdities. Here is one example of the process.

In an attempt to gain more control over the chaotic process, the commission in the week before releasing first draft had to add money to Q2s budget to hire a person to take notes of the instructions that were being given to Q2. All these facts and many more point to a process that is fundamentally out of control.

A COI Decision Tree

In addition to the lack of a robust, functional COI database, the commission has not developed a rational *process* for drawing COI lines. I approached two commissioners in the hallway at the Burlingame *Common Cause* seminar to ask, "What happens when COIs are in conflict?" I got no real answer.

A good deal of the commission's work is technical and legal. The need for perfect congressional numbers and the correct variance for assembly and senate locks down maps and limits choices. The need to comply with the VRA limits the maps as well. It is only in balancing COIs that the commission's work is more art than science, more politics than rigid application of census data and law. And yet, observing the process, the commission seems to have given no thought to *how* to balance COIs.

I am not calling for a rigid structure. That would defeat the purpose and work against the necessary flow of politics. But a total lack of structure is a worse problem. Here are some questions the commission might ask: 1) what weight do we give to "quality" vs. quantity of testimony?, 2) what does "quality" testimony look like?, 3) what importance should we give to previous gerrymanders and to what extent do we have a political and moral obligation to right the wrongs of the past?, 4) can we reject COI testimony that looks like it benefits a particular politician and smells like it was brought to the commission by someone connected to that politician?, 5) how can we achieve rough parity and spread the pain equitably?

I'm sure there are many other questions you the commission could ask that would create a workable structure for the COI balancing and decision making process. The need to bring the COI data and the decision process under control is urgent. Lawsuits will inevitably flow from the chaos.

The Founding Legislation

One handicap the commission has worked under is that Props 11 and 20 are initiatives straight out of the early 20th century Progressive Movement. The initiatives are reactive, anti-political and somewhat puritanical. Governor Hiram Johnson would have approved.

The problems of the classic progressive impulse are several; first, the reformist cure (like Prohibition) can be worse than the disease, second, the reform may react against perceived corruption radically, creating a wild pendulum swing towards an opposite injustice or political absurdity, third, there are always unintended consequences.

As those who have read California history may have noticed, the brainy folks who wrote Props 11 and 20 are very much in the mold of their counterparts of 100 years ago, sophisticated elites with high education levels who believe “intelligence” and “good intentions” are all you need in politics. Bosses and party machines are disdained. And messy political processes are distasteful. Redistricting, it is imagined, can be done collegially over a few glasses of good wine as long as noble legislation is passed and everyone behaves.

The “Alphabet Groups”

Unfortunately, into the political vacuum created by the Prop 11 and 20 “good government” banishment of parties, politicians and paid mapping consultants the special interest groups rapidly flowed, what I call the “Alphabet Groups” of the institutional left. MALDEF, CAPAFR, AARC, NALEO, Greenlining et al claim to be non-partisan political neuters but that assertion is patently absurd.

The unintended consequence of banishing *honest* partisanship might have been anticipated by the smart people who co-wrote and funded the amendments. It wasn't. A better model would have been limited involvement for politicians and parties, not banishment, but that's for another round of initiatives.

The movie *Gerrymander*, produced and released in support of Prop 11 makes it clear that Common Cause was instrumental from the beginning. The Executive Director of California Common Cause was the heroine of *Gerrymander*, a likeable, telegenic spokesperson whose hard work brought Prop 11 to the finish line. What was never clear to viewers or voters was that a phalanx of hard left activist groups would push deep into the commission on Common Cause's coattails.

Political Bait & Switch

To the extent that groups like MALDEF, CAPAFR, AARC, NALEO, Greenlining, etc. end up driving the process, Props 11 and 20 are classic examples of political bait and switch. No one elected these groups. Voters barely realize they exist, much less what their agenda is. Had the citizens of California known,

the narrow margins by which both propositions won would have flipped and the vote would have been overwhelmingly against passage.

This fact creates a huge political problem that the commission doesn't seem to be aware of. Lacking political common sense, the commission has from the beginning been lulled into a bizarre "normalcy" with regard to these groups.

Worse still, with their presence "normalized" early the "alphabet groups" have become politically and legally aggressive. The commission, mostly naïve civilians, has rolled over, pandering to shrewd pols who claim to represent Hispanics, Asians, African-Americans and others but who in fact represent a narrow, self-serving ideology. As a third-generation Hispanic (on my father's side) this deeply offends me.

An Example of Pandering to the Left

Here is one example of pandering. Members of this commission have repeatedly lapsed into Spanish in front of native Spanish speakers as if to prove they are "simpatico." *Yo tambien puedo hablar en espanol...* I'm not going to. I'm not going to speak the language of the kitchens, the language of the construction site or the language of the picking teams because for elites to do so is *condescending*.

To the best of my knowledge, only one commissioner has lived the plight of the marginalized Hispanic with limited English. I believe that commissioner is an honest advocate with shared roots and mother tongue. The rest of us should consider that it may be *more* respectful to speak English, the language of the college classroom, the language of the business office, the language in which this commission will make its decisions.

Commission Diversity

Although the commission was created with diversity in mind, there is far less true diversity than advertised. This problem must be laid at the feet of the framers and the State Audit Department rules by which the commission was chosen, but the commission needs to be aware of its socio-economic and cultural-political homogeneity in order to mitigate the very real *lack* of diversity.

Who represents youth on the commission? Who represents the working classes? Who represents the religious? Who represents small business or the corporate world? Who represents rural interests? No one really. The commissioners most important identity is as members in good standing of the sophisticated, urban elite: all have achievements to be proud of, all have advanced degrees, secure employment, high incomes and a net worth in the top brackets.

There are no high school only or AA degree commissioners. There is no identifiable Catholic, Evangelical, Muslim or Jew. None makes a living with their hands, as I do. None drives a truck, none is a cook or a nurse. Beneath the Sesame Street diversity is a sameness and a blandness that creates

assumptions-in-common that blind commissioners to the “other Californias” they don’t inhabit. If the commission congratulates itself less about supposed “diversity” and listens more, it may begin to alleviate this problem.

A Short Story About Racism

I’d like to tell a short story. As a boy of 13 in LA I had a paper route. Collecting the monthly bill was always a hassle in the working class areas my route served. One hot August day I had finally chased down a fat, white welder with a nasty temper who was always trouble. Habitually unemployed, when he finally opened the door in a greasy tee shirt with a three day stubble, he took one look at me, turned and shouted to his wife, “*The little spick is here for his money!*”

The little spick. My normally fair skin had turned dark brown with the summer. My grandfather *Salaverry* was Peruvian, my grandmother *Quesada* Guatemalan so I guess I was a spick, and the slur sensitized me to the evil of racism for life. However, I didn’t *act* on the slur, not globally. Sadly, the CEO of MALDEF apparently *has* acted globally from an incident at about the same age. His status as a victim of racism is his principal claim to moral authority and political legitimacy, claims I categorically reject.

MALDEF’s current CEO confessed in an internet radio interview that what personally motivates him was an encounter in high school with a “racist” counselor who tried to lock him out of an academic future. Obviously, he prevailed. Mr. Saenes went to Yale, became a bright young star at MALDEF, lawyered for Mayor Villaregosa, was almost tapped by President Obama and has now returned as MALDEF’s CEO. I don’t feel sorry for him. The progress America has made on racism has worked well for him.

MALDEF, CAPAFR, AARC, et al. Claim of Minority Representation

MALDEF, CAPAFR, AARC and others claim to represent the interests of their particular minority. The claim is global, they say in effect, “We’re the only game in town.” This is categorically false.

At the Oakland hearing CCAG brought our *conservative* African American, Hispanic and Asian brothers and sisters. A black psychologist spoke against the presumption of a monolithically left African American community in Oakland. A Chinese-speaking immigrant family spoke against the SF gerrymander. In Redding, a *conservative* Native American spoke out but her tribal areas only added up to a scattered few thousand souls so she was ignored.

In Yuba/Marysville citizens told you of underserved *conservative* Hmong and Sikh communities and asked you to reach out. In San Luis Obispo a *conservative* sixth generation Mexican-American farmer spoke. At Northridge a *conservative* Grand Vice President of the 150 year old Chinese American Citizens Alliance presented maps. These conservatives are the tip of a larger iceberg.

The Real Agenda

In my opinion, MALDEF, CAPAFR, AARC et al are staffed by ideologues who cynically use the minorities in whose name they speak. Although the underlying ethnic groups have obvious political/geographic conflicts (especially in the crowded Los Angeles basin), the “alphabets” who claim to represent them have worked out *their* differences and presented maps in alignment with each other. This was possible because the “alphabet’s” real agenda is not ethnic identity. Hard left ideology unites these groups. And the real agenda is money.

What these groups are most fundamentally about is the political power of each group itself and each group’s ability to go after tax payer money *in the name of minorities*. Despite efforts to mask the fact, it leaks out in testimony about taxpayer funded social services these groups feel entitled to. Unlike the ethnic machines of bygone eras, these modern day Tammany Halls reach past the local patronage pie of an 1800s New York or Chicago into much larger Federal and State coffers. *It’s about the money.*

The strategy spans years: To elect politicians who keep government funds flowing to an ever-increasing social services network that locks minorities into servitude on “Uncle Sam’s Plantation” while paying the fat salaries of “non-profit” and bureaucrat overlords. Conservatives have a different vision.

The MALDEF Calendar Dodge

Researching commission transcripts, I discovered that in February MALDEF, CAPAFR, ALPAC, NALEO etc. convinced the commission to change the first draft schedule. I was frankly shocked.

The commission was originally scheduled to complete input hearings and release first draft maps on May 24th. But on February 26, MALDEF, CAPAFR and AARC with an assist from NALEO half ordered and half bamboozled the commission into changing the date to June 10, against the confused protests of several commissioners.

This front loaded the process, giving MALDEF, et al two and a half extra weeks to get their salaried “community activists” out to gin up the base for the input hearings and to perfect maps. By cutting two and a half weeks from the second draft process, MALDEF disenfranchised conservatives who lacked organization and are just now beginning to realize what happened to them.

Shrewd! During my first visits to the commission I intuited that the process was honest but out of control. When I discovered this calendar dodge I wondered if there was actual collusion between commissioners and MALDEF to undermine a the process. Sadly, there has been gross naivety by those commissioners working for fairness.

Given its institutional arrogance, it was not surprising that statewide maps MALDEF presented in Northridge over reached. As one commissioner noted wryly but almost apologetically, if one creates

amoeba shapes over huge geographic areas, one *can* come up with 17 Hispanic VRA districts. But is this reasonable?

“Quality vs. Quantity” Testimony

One commissioner asked CCAG questions about “quality vs. quantity of COI testimony” during presentation of our maps. The issue was that conservatives at input hearings had said, “We don’t want race and ethnicity as redistricting criteria.” Well, there *has* been “low quality” testimony, for instance, dialogue about “Valley Fever” and calls for LGBT COIs encompassing ten block neighborhoods in Bakersfield.

While conservatives speaking against “racial criteria” may seem “low quality” given the Prop 11 validation of VRA, there is an important moral argument here that goes to the kind of society that sometimes inarticulate and unsophisticated conservatives want. A color blind society. A society in which the true moral progress on race that America has made since the 1960s is recognized and the power of draconian laws wanes.

Has there been moral progress on race in America? Of course there has. MALDEF et al, doesn’t *want* moral progress and will never *recognize* moral progress. But MALDEF et al is not the true heir of Dr. Martin Luther King’s morally profound civil rights movement.

Rather, MALDEF and groups like it are King’s civil rights movement morphed into the morally repugnant civil rights *industry*. Like the anti-communist John Birchers of the 1950’s, MALDEF and its cohorts will see racists under the bed until the millenium because political power and fundraising dollars flow directly from the spurious and cynical charge.

The VRA Section 5

As I am sure the commissioners knows, the Section 5 counties of Kings, Merced, Monterey and Yuba are historical accidents that resulted from late revisions of the VRA during a period when troop flows through Vietnam-era military bases (now closed) coupled with the revised law lead to Section 5.

Have there ever been night riders in white sheets burning crosses in these California counties? Are there likely to be lynchings, poll taxes or Jim Crow laws in the future? As a common sense matter, Section 5 makes no sense in California.

On the other hand, the stigma of Section 5 and the costs of complying with the bizarre application of the statute are real. Currently, Merced County is suing to get out. With costs of \$1 million to comply, Merced has paid a \$200K retainer to litigate. The combined \$1.2 million is taxpayer money that could be better spent.

Worse, the Section 5 tail wags the redistricting dog creating distortions that disenfranchise voters statewide. Monterey's Section 5 ripples north into the Bay Area, south to San Luis Obispo and west into the Central Valley. Yuba county whose Hispanic population has plummeted as Sacramento suburbs spread north, is the tail wagging mid-state dog. Kings County and Merced County impacts the maps in Kern, Ventura and San Luis Obispo, etc.

And all statewide mappers including Q2 have had to begin with Section 5, deal with this aberration as if it were reasonable, and proceed from a foundational absurdity outward.

Section 5 is considered by many (including perhaps a majority of Supreme Court justices) to be unconstitutional. It's application in California has grossly distorted the redistricting process. In one recent session, the commission went around and around in circles on the subject of "Bringing back the Stockton finger," in order to satisfy Section 5 to the south.

That the commission can discuss Section 5 without breaking out into peals of sarcastic laughter is a testament to its plodding diligence. Although the commission cannot by law ignore Section 5, we will insist you limit the distortions and not be overly concerned about lawsuits. Section 5 *needs* to be litigated in California, all the way to the Supreme Court if necessary. Conservatives will gladly join that battle.

The VRA Section 2

VRA Section 2 is fully constitutional and in sync with the 14th Amendment equal protection clause. However, it is politically questionable as California heads toward a higher population of Hispanics than whites with whites now a minority relative to the aggregate "people of color." *And, Section 2 is not settled law.*

In the 2008 APALC video "*Redistricting 2011: Strategies for Asian American and Pacific Islander Communities*", Section 2 litigation is unabashedly referred to as MALDEF's "legal hammer." On camera, MALDEF's senior redistricting attorney (a former staffer for Congresswoman Linda Sanchez) lets her hair down at the insider "alphabets" seminar, decodes the last decade of litigation and says in effect, "We've won some and lost some so we'll use the 'legal hammer' where we can and rely on activists and COIs where we cannot."

Racially Polarized Voting

To further confuse the matter, the politics of Section 2 have changed in real time in front of the commission. The California NAACP testified that there is no Racially Polarized Voting in Los Angeles, and by the way "We want our black representatives in LA left alone." If there is no RPV in LA, the third prong of Gingles vs. Shaw crumbles and Section 2 teeters. That is, unless the "No RPV" claim is so perfectly localized to certain congress people's districts that we still have RPV a few miles away or the claim of a preponderance of circumstances is pulled out of the hat.

The RPV academic that the commission has hired will presumably sort this out with graphs and charts and statistics. Perhaps a naive conservative can ask the “emperor has no clothes” question, “Given the fact that California overwhelmingly voted for Barack Obama against John McCain, can we discover RPV *anywhere* in California?” And by the way, how do we parse Willie Brown, Mayor Villaregosa, etc. into the RPV equation?

Grinding the Redistricting Sausage

MALDEF and its use of the VRA as a legal hammer in redistricting are symptomatic of the deeper structural problem of a citizens commission. Redistricting is partisan warfare, the grinding of political sausage. Ten years of district lines are a huge prize. When politicians do redistricting the process is necessarily brutal.

While I am aesthetically offended by the gerrymanders created in the last cycle, at least in 2001 the politicians ended up with a legislature in rough balance between the numbers of Republican and Democrat voters. My faith the commission will create a similar balance is wavering. And as the process stumbles forward chaotically we need to ask, “Is citizen’s redistricting really a good idea?” The jury is still very much out.

Many of the commissioners truly *are* amateurs. Many don’t seem to realize that they are *representing* those in whose name they sit on this commission. I have watched as the commission tries to do brutal political work by Marquis of Queensbury rules, without breaking a sweat. The commission seems to want to redistrict but remain bosom buddies, as if it can sip wine collegially after each meeting for the next decade. Most importantly, the commission doesn’t seem yet to realize that there has to be horse trading.

The CEO of MALDEF did say one thing in the recent panel discussion “The State of the Latino Nation” that I agree with. After calling the Tea Party (to paraphrase) “A bunch of racist clowns in Revolutionary War costumes,” he turned to Ray Suarez of PBS and opined, “Redistricting is political and requires horse trading.”

Although a rank amateur, I was on the same page in public comments in March against the hiring of left-associated Q2 *and* left-associated Gibson Dunn. I said then, “They’re all honest. You got the one, so give us the other.” The commission ignored me and continues to marginalize the conservative minority, at its peril.

Final Questions

To conclude, I’d like to repeat critical political and process questions.

First: Would the voters of California have approved Propositions 11 and 20 had they known MALDEF, CAPAFER, APALC, NALEO and the Greenlining Institute would sit at the head of the table? Can you reasonable call this a *citizen's* redistricting commission if outcomes are in the end controlled by these special interests? The answer is no.

Second: Is the commission prepared to begin treating COI testimony seriously and to balance competing COI interests by a rational process? Can the commission mitigate its cultural-socioeconomic sameness to make decisions good for all Californians? I hope the answer is yes.

Third: Will the commission begin to make real compromises across the tribal, political divide and do the horsetrading that will make no one perfectly happy but everyone willing to buy in? Or will the commission embarrass itself by leaving a mess for the courts to fix? The jury is still out.

We will continue to watch, to weigh in and to expect a good outcome.
