I am a resident of East Ventura County and thank you for keeping us together and whole in the Senate Seat. As you consider final maps I have one important change: Include us with more of Santa Clarita and less of the 101 corridor in the San Fernando Valley in our Senate Seat.

There has been much testimony that we do not have a community of interest with the high-rises of Encino and Ventura Blvd. Please link us to more of Santa Clarita as you finish drawing the Senate maps. We are not like the 101 corridor of the San Fernando Valley and ARE like the suburban area of Santa Clarita. Thank you.

Solution to Senate Seat

Dear Commissioners:

I am a resident of Thousand Oaks in East Ventura County and I thank you for keeping us together and whole in the Senate Seat. As you consider final maps I have one important change: Include us with more of Santa Clarita and less of the 101 corridor in the San Fernando Valley in our Senate Seat.

All this can easily be done by swapping out the City of Reseda (est 60,000 people) currently in the EVENT SD and putting it in with the LASFE SD. Reseda is a majority Hispanic community and should be put into a district that has a 59% Latino population according to your latest draft map. From there you can take out the City of Granada Hills (est 60,000 people) from the LASFE SD and put it into the LAAVV SD. Granada Hills is a community of interest with many parts of the LAAVV SD. To make up loss population from the EVENT SD, you can take Valencia, Newhall, Castaic, everything east of the 14 Freeway etc ... from the SCV, which would equal to approximately 60,000 people, from the LAAVV SD and complete the equal population swap between the three districts. East Ventura County and Santa Clarita have historically been in the same senate district for the last three decades and are a community of interest.

There has been much testimony that we do not have a community of interest with the high-rises of Encino and Ventura Blvd. Please link us to more of Santa Clarita as you finish drawing the Senate maps. We are not like the 101 corridor of the San Fernando Valley and ARE like the suburban area of Santa Clarita.

Thank you,

Dianne Alexander
Thousand Oaks
Dear Commissioners:

One of the most important aspects of any community are the medical services available. I’m sure that before any hospital is built there are months and years of planning and market research of communities of interest. Many hundreds of thousands of dollars are spent before the first shovel of dirt is dug. The attached photo was taken of a map inside the Los Robles Hospital Emergency room in the city of Thousand Oaks on April 30, 2011. I suggest you use “Trauma Service Areas” map from every major hospital to help you identify the real communities of interest thought out the state.

Please also notice the trauma service area of Los Robles Hospitals’ Trauma Center, located in Thousand Oaks, covers the inland cities of Ventura County over to the East County cities of Thousand Oaks, Oak Park, Moorpark, and Simi Valley (see attachment).
