To the members of the Citizens Redistricting Commission:

The League of Women Voters of California is pleased that you are giving such thoughtful consideration to your plans for concluding the task of drawing new district maps for the state Assembly, Senate, and Board of Equalization and California's congressional seats.

We encourage you to continue your examination of alternatives for what will be in the best interest of the overall process. As you make decisions about your process, we support your goal of giving yourselves and the mappers time to "get it right." Please keep in mind that whatever path you choose, it is essential that you continue to make the process interactive with the public and that input from all interested Californians is welcomed and can be considered.

We wish you the best as you continue your difficult task.

Sincerely,

Trudy Schafer
Senior Director for Program
League of Women Voters of California

I hope these qualities of generosity, determination, and civility that characterize the League’s work inspire you to join us or donate today.
Please keep the High Desert communities together in one district as we have more interests and needs in common, and therefore we need to elect one who can properly represent us in the state legislature.
Commissioners,

One strong reason for releasing second draft maps is the numbering of the Senate districts.

Be assured that everyone is eagerly awaiting that one piece of information.

Jim Wright
