Each set of files (Assembly, Senate, Congress, and Board of Equalization) has been compressed into a single zipped folder. This zipped folder has then been run through a hash generator using a SHA-1 algorithm to create a digital signature capable of confirming bit-level data accuracy. Files were compressed using the native tool available through the Microsoft Windows 7 (Service Pack 1) operating system. The SHA-1 digital signature was created using the freeware application WinHasher 1.0.
