Commissioners & Mr. Claypool,

I just looked at the agenda for tomorrow's meeting and while there's a list of items regarding the maps you are supposed to vote on, there are no details or attachments for the public to see what exactly you are voting on, specifically copies of the maps in simple JPEG or PDF format that most people who use the internet and computers can view.

Even on the Statewide Database site, which the link on your site takes you when you click on it, still only shows maps that are "to be presented" or "previously presented."

The final maps that you are supposed to be voting on tomorrow are not available on your site or attached to the agenda, as is normal practice in California governments.

On your site under Maps, you have the maps in a variety of formats, but not the two that most people who use the internet and computers can view, namely PDFs and JPEGs. Again, the link to the Statewide Database takes you to maps that are "to be presented."

I suggest you post the PDFs and/or JPEG versions of the maps on the site, as you did during the process of the 1st Drafts and those submitted by the various organizations.

Thank you.

Allen Payton

Subject: Walnut Creek

Message Body:

Commissioners: I have posted a number of public comments recently, asking that Commissioner Ward be permitted to present a Minority Report to the Commission. NONE of those comments of mine have been posted on the Commission website. ??? Are you selecting only those comments to post that you WISH to post? What is happening. -- I continue in my request that Commissioner Ward be permitted to present a Minority Report.

Best, Carol Hehmeyer

Subject: CD 11

Message Body:

Dear Commissioners,

I spoke along with 300 other citizens, stating that the CD 11 should use the East Bay Hills as a natural dividing line between Congressional districts. This is the natural COI boundary. Please return the map to the way you had it in July.

Thank you
