I have looked at your "final" proposed map for the state's congressional districts. I am very disappointed that you have moved my neighborhood out of Congressman Dan Lungren's area. The area you are moving me into has a congresswoman who will not represent my values and needs. This completes the destruction of the State I was born in and have loved my entire life. I supported the creation of a "Citizens Commission" to try and stop the self-serving politicians from creating their own custom safe districts. I now see that they have managed to maintain their influence in spite of what I voted for. I urge you to please re-consider the boundary for my congressional representative.

Thank you for your consideration.

George Spatz

Subject: Removal of Fair Oaks from Sac County

Message Body:

Why on earth would anyone want to place Fair Oaks into Placer County where the taxes are lower when we are trying to maintain and progress in small business in a downed economy? That makes absolutely no sense whatsoever. Before just throwing drafting pencils into the air, ALL factors need to be considered. You have taken smaller, positive, productive communities and thrown them under the bus of Placer County. Open your eyes and just drive through Old (even New) Roseville for an example - closed buildings, unfinished structures, and the like. Whereas, Folsom, Fair Oaks (Old and New) are productive, improving and growing in a positive mode. Stripping us from Sacramento County should be considered nothing more than strong-arming the small business and communities into playing a game no one needed to play in the first place. Hate to point out the obvious, the people of California are going to vote for whoever and for whatever they will no matter what people who have been !

given crayons to play with decide or not. Or, is this a method of discriminating and/or eliminating people from decision making so that the chosen few may dictate their own personal wishes upon others. Think people and use some common sense -the two elements which seem to be lacking here.
