Subject: deviations of districts

Message Body:

Generally I have no real fault with the maps, except to say that too much emphasis was on "communities of interest" to the detriment of political boundaries.

The one real criticism I have is the amount of deviation in the Board of Equalization districts. One district has nearly a 100,000 deviation and all are 5 figure deviations. I think with minor adjustments those could be reduced to under 10,000.

This would really follow the spirit and the law of redistricting. Thank you

Subject: Reviewing comments and maps

Message Body:

I propose that all maps be available in kmz, shp, and pdf formats, and that public comments be searchable for keywords and locations.

Thank you.
