I am appalled to hear that the redistricting proposal is to split Pasadena into different districts and to separate Altadena from Pasadena. The whole idea of redistricting was to keep communities together and get rid of the gerrymandering that has split communities in the past. Your proposal does not make sense and was not the kind of plan that was promised when we voted to take the redistricting away from the political pundits and make it independent. Altadena may be in the county but it is an integral part of Pasadena society and not of other communities along the foothills.

Please correct this egregious arrangement.

Very truly yours,

Frank Dryden
