

# Reallocation of Inmate Data for Census 2020

Presentation to the California Citizens Redistricting Commission  
April 26, 2019

Karin Mac Donald

Statewide Database

[karin@statewidedatabase.org](mailto:karin@statewidedatabase.org)

# Background

- Legislature to take steps to ensure that a complete and accurate computerized database is available for redistricting
- AB420 (Davis) as amended by AB2172 (Weber)

# Overview of AB2172 Clarifications/Changes

- Information provided from CDCR to the CRC will also be provided to the Legislature regarding each inmate incarcerated in a state correctional facility.
- Requires the information submitted to be in the form of a single electronic file for each database maintained by CDCR.
- Requires the information provided to reflect the inmates that are in facilities under the control of CDCR on April 1, 2020 and on every decennial Census Day beginning in 2030.

# Clarifications/Changes cont.

- Defines “state correctional facility” as a facility under the control of CDCR.
- Deletes provisions of law pertaining to SOMS not being operational before April 1, 2020. SOMS is currently operational.
- Information from CDCR must include the residential address or addresses at which the inmate was domiciled before the inmate’s more current term of incarceration, including information about the date on which each address was added to records

# Clarifications/Changes cont.

- Provides that if CDCR does not have any residential address information for an inmate, then the information provided by CDCR states that fact.
- Requires CDCR to provide information about the ethnicity, as identified by the inmate, and any information about the race of the inmate to the extent such information is maintained by CDCR.

# CDCR Collection of Ethnicity and assignment of Race; Examples

Inmate Ethnicity	Inmate Race
American Indian	American Indian/Alaskan Native
	Other
Black	Black
	Other
Cambodian	American Indian/Alaskan Native
	Asian or Pacific Islander
	Hispanic
	Other
	White
Chinese	Asian or Pacific Islander
	Other
	Unknown
Columbian	Hispanic
Cuban	Cuban
	Hispanic
	Other
Filipino	Asian or Pacific Islander
	Other
Guamanian	Other
Guatemalan	Hispanic
Hawaiian	American Indian/Alaskan Native

# CDCR Collection of Ethnicity and assignment of Race; Examples

Hispanic	Black
	Hispanic
	Mexican
	Other
	White
Indian	Asian or Pacific Islander
Jamaican	Black
Japanese	Asian or Pacific Islander
Korean	Asian or Pacific Islander
Laotian	Asian or Pacific Islander
	Other
Mexican	Hispanic
	Mexican
Nicaraguan	Hispanic
Other	Asian or Pacific Islander
	Other
Other Asian	Asian or Pacific Islander
	Other

# Clarifications/Changes cont.

- Requires CDCR to provide the address of the correctional facility where an inmate is incarcerated on the decennial census day.
- Requires the Legislature, in coordination with the CRC, to ensure that the information provided by CDCR is included in the computerized database that is used for redistricting.
- “Last known place of residence” means the most recent residential address of an inmate before the inmate’s most current term of incarceration that is sufficiently specific to be assigned to a census block. If the inmate’s residential address is not sufficiently specific to be assigned to a census block, the “last known place of residence” means a randomly-determined census block located within the smallest geographical area that can be identified based on the residential address information provided by CDCR.
- Updates terminology to more accurately describe those inmates who are in facilities under the control of CDCR

# A note about data transfer and security

- SWDB's agreement with CDCR specifies data security requirements to maintain confidentiality and comply with state and federal standards and the State Administrative Manual Chapter 5300, which concerns "protection of information, information systems, equipment, software, and people from a wide spectrum of threats and risks" (section 5300, "Introduction")
- "SWDB shall comply with all applicable federal laws and regulations protecting the privacy of citizens"
- "it is anticipated that most data shared with SWDB will involve a mix of data classes including Sensitive and possibly Confidential information" (section 5.2, "Data Handling Requirements")

# Data transfer and security cont.

- The primary components of data security pertain to the encryption of data in transit, and the encryption of data at rest
- Data will be transmitted “following industry standard cryptographic technologies: SSL/TLS, IPSec, SSH/SCP, PGP” (section 6.1, “Internet Access”).
- The agreement also stipulates that “data must be stored in an encrypted format. Encryption algorithms shall be AES-128 or better, or Triple-DES (3-DES)” (section 6.2, “Data Storage”).

# Questions?

Thank you!
