Options for CRC and USDR to engage henceforth - Jan 20, 2021

Note: We have an assumption that a more permanent support system (i.e., not USDR) will need to be hired through Aug/Sept for CRC data management to be successful

		Pros	**Cons**
1	• USDR builds out data collection, management, analysis, and publishing • CRC hires data analyst (USDR helps)	• Start building sooner rather than later • Analyst role becomes less broad; candidate pool increases	• Hired analyst is locked into technology we choose (e.g., Airtable, Tableau, or Other)
2	• CRC hires data analyst (USDR helps) who builds out data collection, management, analysis and publishing	• Hired analyst can choose appropriate technology that they are well versed in	• Start building later • Analyst role is broad (consider multiple roles or an agency)

Option 1

	USDR	Hired Analyst(s)	CRC
Hiring data analyst(s)	X		X
Data collection	X	X	
Data management	X	X	
Data analysis (inform decision making)	X	X	
Data publishing (to the public)	X	X	
Ongoing maintenance/management/support		X	X
Redistricting decisions and meetings			X
Other?			

Option 2

	USDR	Hired Analyst(s)	CRC
Hiring data analyst(s)	X		X
Data collection		X	
Data management		X	
Data analysis (inform decision making)		X	
Data publishing (to the public)		X	
Ongoing maintenance/management/support		X	X
Redistricting decisions and meetings			X
Other?
