## Options for CRC and USDR to engage henceforth - Jan 20, 2021

Note: We have an assumption that a more permanent support system (i.e., not USDR) will need to be hired through Aug/Sept for CRC data management to be successful

		Pros	Cons
1	<ul> <li>USDR builds out data collection, management, analysis, and publishing</li> <li>CRC hires data analyst (USDR helps)</li> </ul>	<ul> <li>Start building sooner rather than later</li> <li>Analyst role becomes less broad; candidate pool increases</li> </ul>	<ul> <li>Hired analyst is locked into technology we choose (e.g., Airtable, Tableau, or Other)</li> </ul>
2	<ul> <li>CRC hires data analyst (USDR helps) who builds out data collection, management, analysis and publishing</li> </ul>	<ul> <li>Hired analyst can choose appropriate technology that they are well versed in</li> </ul>	<ul> <li>Start building later</li> <li>Analyst role is broad (consider multiple roles or an agency)</li> </ul>

## Option 1

	USDR	Hired Analyst(s)	CRC
Hiring data analyst(s)	Х		X
Data collection	X	x	
Data management	Х	X	
Data analysis (inform decision making)	Х	X	
Data publishing (to the public)	Х	x	
Ongoing maintenance/management/support		X	Х
Redistricting decisions and meetings			Х
Other?			

## Option 2

	USDR	Hired Analyst(s)	CRC
Hiring data analyst(s)	Х		Х
Data collection		Х	
Data management		х	
Data analysis (inform decision making)		Х	
Data publishing (to the public)		х	
Ongoing maintenance/management/support		X	Х
Redistricting decisions and meetings			Х
Other?
