Considerations	Background and/or Recommendations
COI Public Input Meetings- Appointment System	- Staff have identified options for an appointment system for Public Input meetings but need to continue to research capabilities of tools available to them to set up an appointment system for the June 10th meeting *Open appointment slots for public input will become available 2 weeks in advance from the June 10th meeting. Registration to close 2 days before the meeting date.* *Appointments will be assigned to 70 to 90 minute blocks* *The last block of time would be open to the public who could not reserve an appointment slot. Call in information would be provided day of meeting.* *Staff can support the public who do not have internet access and would like to call in (main office line: 916-323-0323).* *Here are the fields for the appointment system:* *Name* *Email* *Phone* *Are you requesting an interpreter (These would be for designated interpreter blocks of time)* *What geography will you be providing input on (please note counties, cities etc)* *COI Tool Submission ID (To be determined for future meetings)* *Not recommending uploading files/images/maps in Appointment form* *Logistics for sharing with VSS and Line Drawers* *Ensuring no Personal Identifying Information* *Extra time during Public Input Meeting to pull up documents* *Public can still submit public comment to votersfirstact@crc.ca.gov*

COI Public Input - Speaker Visibility during Public Input Meetings	- Yes this is possible. - Additional security and other protocol recommendations will be implemented. - People who do not have an appointment cannot be on video and would have to call in by phone.
Posting link to COI Tool (www.drawmycacommunity.org)	VSS can provide a link to the COI tool on the Live Streaming Landing page and can include the link on the live stream somewhere on the video window
COI Public Input - Timing System	- Researching options to display as a timer/stopwatch for public input. - VSS can provide 30 second remaining notice. - Commission to establish protocol for speakers that go over the time limit. - Commission to establish protocol for speakers that provide non-COI input during time that is dedicated to COI Public Input.
COI Public Input - Attachments	- No attachments from public /no public participant screen sharing for display during Public Input Meeting - Line drawers will be able to pull up a general map for context based on public input given (City, County etc).
COI Public Input - Protocol with interpreters during meetings	Staff is working with VSS to create a script and protocol for interpreters
