What criteria are used when drawing maps?

FACEBOOK

The Commission must follow these criteria, in this order, when drawing district maps:

1. Districts must be of equal population to comply with the US Constitution.
2. Districts must comply with the Voting Rights Act to ensure that minorities have an equal opportunity to elect representatives of their choice.
3. Districts must be drawn contiguously, so that all parts of the district are connected to each other.
4. Districts must minimize the division of cities, counties, neighborhoods and communities of interest to the extent possible.
5. Districts should be geographically compact: such that nearby areas of population are not bypassed for a more distant population. This requirement refers to density, not shape. Census blocks cannot be split.
6. Where practicable each Senate District should be comprised of two complete and adjacent Assembly Districts, and Board of Equalization districts should be comprised of 10 complete and adjacent State Senate Districts.

In addition, the place of residence of any incumbent or political candidate may not be considered in the creation of a map, and districts may not be drawn for the purpose of favoring or discriminating against an incumbent, political candidate, or political party.
