[David Shipley](#) left feedback on [Contact](#)

“YOUR JOB is to create competitive districts. Every politician should have to compete equally for their job. The questions you are asking smack of self segregation by Party and that is the exact opposite of what your commission was chartered to do! Even your representation on this commission should be representative of party percent of voters, meaning at least one party is over-represented. Get this right, make every district competitive, this is not a self organizing, who’s my buddy, map exercise, its about making politicians accountable and none completely safe....even if it means taking slices of urban and rural areas and putting them together.”
